Suction Line Filters
CFA Uni-Form® Shell Replaceable Cartridges

F Series
Replaceable Filter Cartridge

• Super-pleated filter media provides up to twice the filter area of any other pleated or non-pleated filter cartridge today.
• Traps solid contaminants down to 10 microns in size.
• Integral end rings are permanently bonded to filter media.
• Stainless steel helical wire spring within the filter eliminates the possibility of cartridge collapse under normal operation conditions.

DF Series
Replaceable Dual-Purpose Filter Plus Drier Cartridge

• Molded solid core of specially blended molecular sieve and activated alumina produces a dual-purpose suction line filter/drier of unusually high efficiency and capacity.
• Can be used for system clean-ups or on a permanent use basis.
• Solid contaminants never reach the desiccant core.
• Moisture and acids are efficiently removed from the refrigerant stream.
• All filters or filters plus driers should be changed when pressure drop across cartridge increases significantly.
• All filters or filters plus driers are rated in accordance with ARI standard 730-86.
• Always follow compressor manufacturer’s recommendations.
